

Design and Implementation Services for the RSA® Data Loss Prevention Suite

Ensure rapid deployment and integration of RSA data protection products.

At a Glance

- Leverage RSA's proven services methodology, utilizing best practices and industry standards to maximize the value of the RSA investment
- Ensure a smooth and effective deployment of the RSA solution
- Make information-centric security a reality across your enterprise
- Align security with strategic goals
- Realize quick start-up and faster return on investment
- Complement in-house resources
- Customized development and integration services for in-house and third-party applications

RSA® Professional Services for the Data Loss Prevention Suite

When your goal is to deploy an enterprise data protection solution, you want to work with the best people in the industry. That's why so many enterprises rely on RSA Professional Services. Smart, experienced, skilled and committed to your success, the people of RSA Professional Services can help you quickly achieve the benefits of proven RSA technology while reducing the risks often associated with new technology initiatives.

Benefits

Our multi-phase design and implementation services apply best practices in the planning, implementation and step-by-step production roll-out to ensure that the deployment of RSA® Data Loss Prevention achieves desired business and security objectives. Organizations that choose RSA Professional Services can realize the following business benefits:

- Achieve the desired business objectives while minimizing the implementation time for the RSA® Data Loss Prevention Suite in their environment.
- Achieve a seamless migration of an existing RSA DLP environment to the newest available release.
- Ensure that customers are leveraging all RSA DLP features to support their business objectives.
- Leverage the knowledge and experience of dedicated RSA® Data Loss Prevention consultants.
- Ensure that their data loss prevention environment is consistent with RSA and Industry best practices.

RSA Professional Services Is Your Trusted Partner

RSA Professional Services help organizations define security strategies and implement solutions to mitigate risk, ensure compliance and accelerate business objectives. We consistently achieve this goal by working with customers to ensure that security initiatives are tightly aligned with critical business goals – growing revenues, reducing costs, speeding time-to-market and expanding partner relationships. RSA Professional Services bring experience, global coverage and our heritage as a driving force in information security innovation to the increasingly complex security challenges which you face. We enjoy a position of global leadership in security consulting and services, and provide the unique capability of serving a customer's end-to-end requirements – from objective, strategic assessments of security strategies through to, and including, the design, implementation and lifecycle optimization of best-in-class, cost efficient security and compliance solutions.

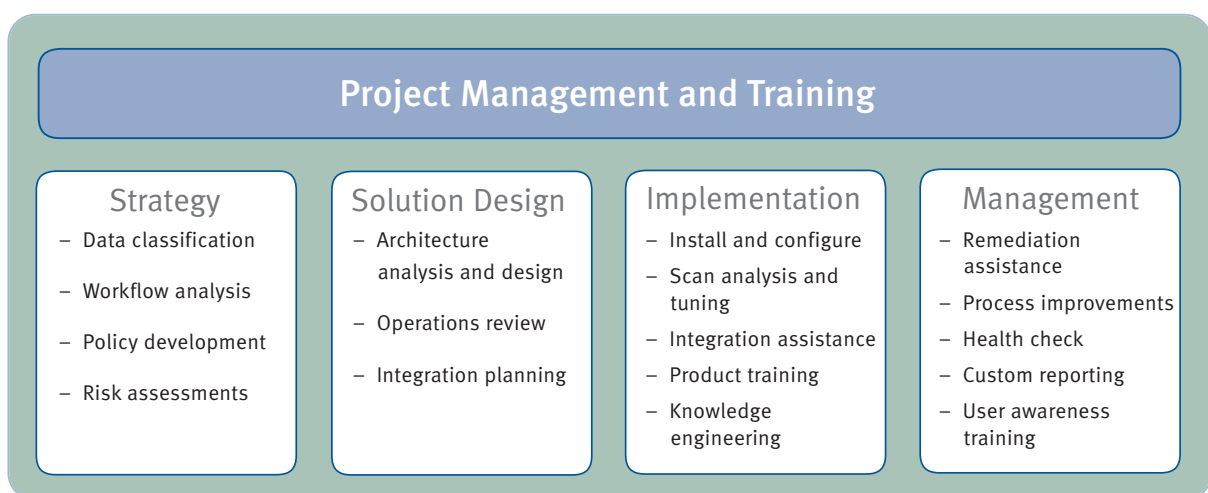

The experts of RSA Professional Services help transform our industry-leading data loss prevention and security technology into enterprise data protection solutions that can deliver value for our customers. Leveraging over 25 years of expertise in the security industry, RSA provides

unparalleled security expertise. Rigorous training and certification keeps our Professional Services' experts at the very top of the industry; over 90% of our people are CISSP certified, with many challenging themselves to gain other industry certifications, such as MSCP, MSCE, CCIA and CCE.

A Proven Services Methodology

With more than 25 years of experience in the security industry, RSA Professional Services utilizes a proven services methodology that leverages best practices, methodology and industry standards to provide a comprehensive data loss prevention solution. Implementing this framework will help you to protect your organization against major threats to your data such as breaches by privileged users, lost or stolen media and lapses or failures of defined security processes. By following this framework, companies can not only improve their ability to secure sensitive customer data but also protect revenue, ensure customer loyalty and meet government regulations. From the earliest planning stages through final deployment, RSA Professional Services will help ensure that your solution addresses your unique needs for enterprise data security.

A Proven Services Methodology

RSA Data Loss Prevention Suite Services Portfolio

| | Fixed-Price Services | Objective | Description | Deliverable |
|--|--|--|---|--|
| Express Services* | SureStart for RSA DLP Datacenter and Endpoint | Recommended for all new RSA DLP Datacenter and Endpoint implementations to ensure smooth start up and quick ROI. | Implementation planning, knowledge transfer, scanning and deployment services in a single environment. Consists of up to four (4) days on-site consulting. | RSA DLP environment consisting of DLP policy and scanning elements supporting pre-defined data types. |
| | SureStart for RSA DLP Network | Recommended for all new RSA DLP Network implementations to ensure smooth start up and quick ROI. | Implementation planning, knowledge transfer, scanning and deployment services in a single environment. Consists of up to four (4) days on site consulting. | RSA DLP environment consisting of DLP policy and scanning elements supporting pre-defined data types. |
| Implementation Services* | Installation and Configuration Services (3 levels) | Recommended for all RSA DLP implementations where the customer is looking for a quick startup. | These services allow a customer to implement the RSA DLP solution in an efficient time frame, while ensuring that the solution is implemented according to industry and RSA best practices. | RSA DLP environment consisting of DLP policy and scanning elements supporting pre-defined data types. |
| | Scan Analysis and Tuning (3 levels) | Recommended for all RSA DLP implementations where the customer is looking for assistance with initial scanning analysis or tuning a poorly performing scan environment. | These services focus on the analysis and tuning of DLP scan operations in a single customer environment in one geographic location | A DLP Scan Analysis report which details the recommendations for the implementation of the proposed DLP scanning parameters. |
| Planning Services* | Architecture Design and Planning | Recommended for larger multi-site environments with an enterprise license. Consideration is given to environment-specific requirements such as business continuity, token provisioning, choice of token form factors and administrative processes. | Assessment of the business requirements of a new customer, architecture design analysis, knowledge transfer, Business Continuity option and other feature considerations. Document recommended architecture and implementation plan. Consists of five (5) days architecture consulting. | Report describing the recommended architecture, environment specific requirements and implementation plan. |
| | Quoted Services | Objective | Description | Deliverable |
| Solution Design and Implementation Services | <u>Migration Planning</u> <u>Implementation</u> <u>Customizations</u> <u>Project Management</u> | Consulting services to provide customers with large and complex environments with the technology, development and project management expertise to successfully implement or upgrade an RSA SecurID® infrastructure. | Provide the consulting resources necessary to put into operation an RSA Authentication Manager infrastructure (new or existing). Depending on customer requirements and practices, this may consist of assisting with Dev, QA and/or pilot environments leading to a production implementation. | Specific tasks and deliverables as defined in a Statement of Work agreed to by the customer |

*Express Services and Planning Services include travel and expenses and are further described in detailed services descriptions; ask your RSA sales representative.

Why RSA?

RSA, The Security Division of EMC, is the expert in information-centric security, enabling the protection of information throughout its lifecycle. RSA enables customers to cost effectively secure critical information assets and online identities wherever they live and at every step of the way, and manage security information and events to ease the burden of compliance. RSA offers industry-leading solutions in identity assurance & access control, encryption & key management, compliance & security information management and fraud protection. These solutions bring trust to millions of user identities, the transactions that they perform, and the data that is generated.

Take the next step

Benefit from a design and implementation solution by the world leader in information management and storage. RSA understands information-centric security, and how to make the information itself secure. Contact your RSA sales representative today for more information, or visit www.RSA.com.
